

ADONIS

Recreational Activity Management Software

New!

Special edition for
non-profit-making organizations

Managing your camp
is now... child's play!

What is Adonis ?

Adonis is a management software especially designed to manage recreational activities. It was developed in close collaboration with a number of people from the world of recreational activities, tourism and camping. Adonis fits your administrative requirements whether you have an outdoor center, a summer camp, a community or a municipal recreational activity center.

Adonis is a complete and user-friendly software. It meets your organization's administrative requirements and makes your daily management easier.

Adonis' change-ability offers incredible flexibility to recreational activity organizations requiring personalized management methods.

Work efficiently using an economical and tailor-made tool.

Managing your camp is now... child's play!

Why choose Adonis?

Specially designed for recreational activity management

Developed in close collaboration with a number of people from the world of recreational activities, tourism and summer camps, Adonis is a unique tool especially designed to meet their specific management requirements. Are you managing an outdoor center, a summer camp, a municipal or community recreational activity center? Then, Adonis is for you!

Each Adonis functionality is designed and optimized to match your reality and make your work easier. What good is a general billing software system if it doesn't meet the specific needs of your type of business? Are you still manually managing registration, billing, mailing Child Care Expenses forms, camper information, meals, transportation and promotional item coordination? Is your time well distributed among your organization's different administrative tasks? Do you have all the tools and reports allowing you to make intelligent decisions?

Because Adonis was designed to meet your specific requirements, it is an essential tool which can help you control, analyze and plan a tool to help you avoid numerous problems...

Save time and money

Users are unanimous: Adonis is above all user-friendly. Its user-friendly interfaces, the meticulous organization of its work area and the addition of intuitive visual tags make Adonis a tool that adjusts to fit your work environment.

These same users will also tell you that the automated printing of the Child Care Expenses form, the on-line registration, the billing via e-mail, the mass mailing module, the activity planning and the user-friendly registration and billing management are only a few of the advantages that justify the use of this software system.

In addition to managing the administrative aspects of a recreational activity organization, Adonis makes customer and accounts receivable follow-up easier. Say goodbye to scribbled notes and communication problems: Adonis takes care of everything with its internal messaging systems.

Every time you use it, Adonis saves you money and precious time.

On-line registration module

Since the 2004 edition, Adonis allows you to accept registration on your own Web site. All data entered by your customer while registering on the Internet is automatically integrated into Adonis! All you have to do is validate it. Couldn't be easier!

This module by itself could help you save 50% of your data entry time. Some of our customers are so pleased with this module that they receive up to 80% of their registrations on the Internet!

And now, your customers can pay on-line, while they're registering!

A team that meets your expectations

Releasing our on-line registration in 1999 and Adonis in 2002 has established us in the field of recreational activity management. We are constantly trying to find new technologies to streamline our customers' workloads by offering performance tools that justify the investment. That is why today our customers are doing good business all over America.

Adonis Technologies' managers are information technology specialists who have vast expertise in designing and managing applications.

Adonis is a product in constant evolution, as shown by our recent deployment of our on-line payment module. Our business is closely linked to the recreational activities field and is the official service provider for the Quebec Camp Association.

Special NPMO Edition

To better meet the needs of non-profit-making organizations (NPMO), such as community centers and charitable organizations, a new edition of Adonis is available: the NPMO edition.

This special edition offers all basic features of the professional edition and allows complete and user-friendly management of your organization.

The NPMO edition allows you to achieve substantial savings while efficiently managing your recreational activity organization and staying within a restrictive budget.

The NPMO edition is offered exclusively to non-profit-making organizations.
